Professional Summary

Self-taught Full Stack Developer with hands-on experience in Python, Java, and AI/ML through self-driven projects using modern development frameworks. Proven ability to complete full development lifecycle projects from design to deployment. Seeking a challenging entry-level role to apply technical skills and contribute to innovative software solutions.

Technical Skills

- **Languages:** Python, Java, JavaScript, TypeScript, SQL, HTML5, CSS3
- **Frameworks and Libraries:** React.js, Redux, RTK, Next.js, FastAPI, Tailwind CSS
- **Databases:** PostgreSQL, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code
- **Other:** RESTful APIs, WebSockets, CRUD Operations, SDLC, AJAX

Academic Qualification

B.Sc in Computer Science

Calicut University, Kerala
2023 – 2026 | CGPA: 5.9/10

Projects

1. AI-Based CCTV Multi-Detection System

Tech Stack: FastAPI, React.js, PostgreSQL, YOLOv8, MediaPipe, OpenCV, PyTorch, React Native

- Built a full-stack AI-powered surveillance platform for real-time detection of falls, theft, abuse, and emergency incidents.
- Developed scalable REST APIs, authentication, and database integration using FastAPI and PostgreSQL.
- Implemented AI-based detection, live monitoring, real-time notifications, and blockchain-ready evidence management.
- Built responsive web and mobile dashboards for incident monitoring and system management.

2. Disease Predictor with Chatbot Integration

Tech Stack: FastAPI, React.js, SQLAlchemy, Scikit-learn, JWT, OCR (Tesseract)

- Developed a full-stack healthcare platform for disease prediction and mental health assessment.
- Developed features for blacklist management and automatic responses to unwanted calls.
- Integrated machine learning models, OCR processing, PDF report generation, and an AI chatbot assistant.
- Designed a responsive user interface for symptom analysis and healthcare recommendations.

3. Auto Call Rejector with Smart Response

Tech Stack: Kotlin, Jetpack Compose, Material Design

- Built an Android application for intelligent call management and automated call rejection.
- Developed features for blacklist management and automatic responses to unwanted calls.
- Implemented a modern user interface with light/dark theme support.
- Focused on performance, usability, and seamless user experience.

4. Portfolio Website

Tech Stack: Next.js, TypeScript, Tailwind CSS, Framer Motion, EmailJS

- Designed and developed a responsive portfolio website to showcase projects, skills, and professional achievements.
- Built reusable UI components with smooth animations and responsive layouts.
- Implemented contact form integration, dark mode, SEO optimization, and modern UI/UX principles.
- Deployed the application using modern web development best practices.

Soft Skills

Team Collaboration | Problem Solving | Quick Learner | Time Management
